

# KYC Case Management Dashboard

## Project Overview

Developed a KYC Case Management Dashboard to track customer onboarding and periodic review cases, monitor escalations, manage document completeness, and analyze analyst productivity.

## Key Features

- Case pipeline tracking for onboarding and periodic review cases
- Risk classification (Low Risk, Medium Risk, High Risk)
- Escalation monitoring and overdue case tracking
- Document completeness and verification tracking
- Analyst performance monitoring
- KPI-based reporting and dashboard visualization
- Case status analysis (Approved, Pending, In Review, Escalated)

## Dashboard Metrics

- Total Cases
- Approved Cases
- Escalated Cases
- Overdue Cases
- Risk Rating Distribution
- Analyst Performance Breakdown
- Document Completion Percentage

## Corporate Entity Types Covered

- Private Companies
- Public Companies
- Trusts
- Partnerships
- LLPs

## KYC Concepts Demonstrated

- Customer Due Diligence (CDD)
- Risk-Based Customer Classification
- UBO (Ultimate Beneficial Owner) Verification
- Escalation Management
- Document Verification
- SLA Monitoring

## Tools Used

- Microsoft Excel
- Data Analysis
- Dashboard Design
- Pivot Tables
- Charts and KPI Reporting

## Outcome

Built an end-to-end KYC operations dashboard that simulates real-world compliance workflows and supports effective case management, risk assessment, and operational reporting.
